Institutional Report

College of the Desert

Midterm REPORT

Submitted by:

Desert Community College District

43-500 Monterey Ave
Palm Desert, California 92260

Submitted to:

Accrediting Commission for Community and Junior Colleges,
Western Association of Schools and Colleges

March 15, 2014
Certification of Accreditation Midterm Report, March 15, 2014

This Accreditation Midterm report has been prepared and is being submitted as a requirement of the external evaluation team visit of April 12, 2013. The report addresses the progress and resolution on the recommendations identified in the July 3, 2013 letter from the Accrediting Commission for Community and Junior Colleges (ACCJC) and describes progress on planning agenda items as identified in the 2010 Institutional Self Study.

We certify there was a broad participation by the campus community and believe this Midterm Report accurately reflects the nature and substance of this Institution.

Signatures:

Joel L. Kinnamon, Superintendent/President
Becky Broughton, Chair, Board of Trustees
Doug Redman, President, Academic Senate
Denise Diamond, President, Faculty Association Union
David Bashore, President, Adjunct Faculty Union
Lauro Jimenez, President, Classified Staff Union
Eleanor Campbell, President, Associated Students
Annebelle Nery, Accreditation Liaison Officer

Midterm Planning Documents ............................................................................................. c
In order to prepare for the Midterm Report, a small team was convened in January 2014 to draft the document. This group represented faculty, classified staff, administration, research, and the student liaison. Faculty representatives were appointed by the Academic Senate including the Chair of the Outcomes and Assessment Committee, which is a standing committee of the Academic Senate. This group also represented those individuals who had worked closely with the recommendations since the external evaluation team visit.

This group was responsible for developing a timeline for the preparation of this Midterm Report, to work with all campus constituents and departments to gather information and evidence of progress, and to draft the Midterm Report. The draft Midterm Report was made available to the college community. Finally, the final Midterm Report was reviewed by individual constituent groups, the President’s Cabinet, the Academic Senate and the College Planning Council, which includes leadership, faculty, staff, and student representation.

The Desert Community College District Board of Trustees received a copy of the final Midterm Report with supporting documents at the March 2014 Board Meeting.
Response to the Commission Action Letter

In their June 2013 meeting, ACCJC accepted the findings of the 2013 Visiting Team, their report as well as the College’s 2013 Follow-up Report, documenting the College progressive movement forward in advancing integrated planning and processes relative to satisfying all outstanding Recommendations with the exception of Recommendations one and five. The College continues to develop planning and processes in support of the items outlined in these Recommendations.

Recommendation 1:
In order to increase effectiveness, the team recommends that the college complete the implementation of the comprehensive planning process by responding to the analysis of assessment results to ensure improvement in student learning. Such a process integrates the various college plans; is informed by quantitative and qualitative data and analysis; systematically assesses outcomes within both instruction and non-instructional services; and provides for an ongoing and systematic cycle of goal setting, resource allocation, implementation, and evaluation (l.B.1; l.B.2; l.B.6; l.B.7).

Response
The visiting team acknowledged that “the College has initiated a College Planning Council and a Planning and Institutional Effectiveness Process (PIE),” however, that process was interrupted by the temporary implementation of “Think Tanks” to address the state fiscal crisis in 2011-2012.

As stated in a previous Follow Up Report (2012), the College Think Tanks were created to address the budget crisis and were dissolved once a fiscally responsible plan of action was agreed upon. Since then, the College focused on implementing the planning process and using the College Planning Council. In an effort to integrate assessment, program review, planning, and resource allocation, the College Planning Council convened a Planning Task Force on April 26, 2013 (1.1). One of the charges of the Planning Task Force was to develop a set of assessments to assess this process and the past governance structure (1.2; 1.3). The Planning Task Force had administrators appointed by leadership, faculty appointed by the Academic Senate, classified staff appointed by the Classified Staff Union, and the Director of Student Life as a student liaison. The Planning Task Force completed their report and submitted it to the Assessment of Planning Outcomes (APO) Subcommittee, a subcommittee of the College Planning Council, for review on September 20, 2013 (1.4; 1.5). On September 13, 2013, the chair of the APO, Chris Nelson, acknowledged the summer work of the Planning Task Force and the Task Force’s work on creating a survey focused on what is currently done and as means of a continuous form of assessment of the planning process and the College Planning Council (1.6). On September 27, 2013, the Planning
Task Force’s Report and the College Planning Council Survey was reviewed by the College Planning Council, and the Council moved to survey the college community on the planning process and the role of the College Planning Council (1.7). The purpose of this survey is to determine the degree to which faculty, leadership, staff members and students understand the structure of the College Planning Council (CPC). The survey will also determine the degree to which faculty, staff members and students consider the process in the CPC to be effective (1.8). The responses provided will be used as a pre-assessment tool measuring the changes in college constituents understanding of the CPC. The survey was released in January 2014 and the Office of Institutional Effectiveness will continue to collect the results throughout the spring 2014 semester (1.9). The results of the baseline survey of the College Planning Council and planning processes will be presented to the college constituents including the Assessment of Planning Outcomes Subcommittee and the College Planning Council at the end of the term.

When the CPC moved to survey the existing process on September 27, 2013, there was institutional momentum to implement the Planning and Institutional Effectiveness Process (PIE) immediately beginning with the 2012-2013 Program Review Updates (PRUs). Even though the PIE process for the 2013-2014 academic year should have been completed within the 2012-2013 academic year, there was an institutional commitment to honor the hard work of the faculty, the instructional departments, and the student services departments by completing a full PIE cycle using the 2012-2013 Program Review Updates (PRUs) in the fall 2013 term for funding in the 2013-2014 academic year. Beginning in September 2013, all instructional and student services PRUs were collected and the Office of Institutional Effectiveness began analyzing data and collecting instructional equipment requests and centralized that information into one comprehensive list (1.10). A workgroup was convened to ensure a representative group was available to commit the time and energy needed to complete this cycle within an aggressive timeline. The workgroup consisted of the Executive Vice President, the Deans, Department Chairs and the Executive Committee of the Academic Senate. The first meeting of the workgroup was Friday, September 27, 2013. The workgroup reviewed the centralized equipment list as well as potential criteria that could be used when prioritizing the equipment at the School level (1.11; 1.12). The charge of the representatives in the workgroup and the charge of the Deans was to prioritize the equipment lists at the unit level, which included the School Dean, the Department Chairs and the Faculty within their respective departments (1.13a; 1.13b). The second charge of prioritization had to be completed using the student achievement data and student learning outcome data provided in the PRUs and using a set of criteria. Once the lists were prioritized at the School level, the workgroup reconvened on Friday, October 11, 2013, and each School presented their prioritized equipment list, their supporting data including data from the PRUs, and the criteria used to prioritize. Once
each School completed their presentation, the group prioritized an equipment list at the institutional level (1.14). The finalized list along with the corresponding criteria and supporting data, was presented to the College Planning Council and the President accepted the prioritized list as submitted (1.15).

The mission of the College states that “College of the Desert provides excellent educational programs and services that contribute to the success of our students and the vitality of the communities we serve.” As evident in the criteria sheets, College of the Desert’s Mission Statement was a driving force in the equipment prioritization process, which included the building of educational programs, the effective delivery of educational services, the focus on student success, and the labor market demands of the communities we serve. After assessing the fiscal capacity and leveraging multiple funds, the President announced that the entire 2012-2013 equipment list would be funded during the 2013-2014 academic year.

Concurrently, while completing a PIE cycle from the 2012-2013 Program Review Updates for funding in the next academic year, the College and the Academic Senate agreed to work together again to implement a PIE cycle using the 2013-2014 PRUs for funding in 2014-2015 academic year. The Outcomes and Assessment Committee (OAC), a standing committee of the Academic Senate, reviewed the 2012-2013 PRUs in order to streamline the current 2013-2014 PRUs, the committee created multiple addendums (1.16). Also as a result of the recent funding of the 2012-2013 equipment priority list, the OAC created an information and training campaign to retrain faculty on the PIE process and the how PRUs are integral to planning and resource allocation (1.17). The 2013-2014 PRUs were submitted to the OAC by October 15, 2013, and once again the Office of Institutional Effectiveness centralized a list of faculty positions (1.18). As in the previous cycle, the workgroup consisted of the Executive Vice President, the Deans, Department Chairs and the Executive Committee of the Academic Senate. The first meeting took place on November 1, 2013 and the 2nd meeting took place November 13, 2013 (1.19). As in the previous cycle, this prioritization cycle was informed by student achievement data and student learning outcome data provided in the PRUs and an agreed upon set of criteria, which was forwarded to the Academic Senate, College Planning Council, and then ultimately, the President (1.20; 1.21). After reviewing the quantitative and qualitative data, as well as the PIE process that was followed, the President responded to the recommendations on Friday, December 13, 2013. President/Superintendent Dr. Joel Kinnamon announced which positions would be funded, citing the mission, the goals, the quantitative and qualitative data, and Program Review Updates that informed his decision (1.22a; 1.22b).

The College has completed two cycles of the PIE process (13-14 equipment prioritization and the 14-15 faculty prioritization), and is now in the process of
completing yet another cycle within the process for an equipment prioritization list to be funded in the 2014-2015 academic year. Also the Office of Institutional Effectiveness will be creating multiple assessments to evaluate all three cycles of the prioritization process that integrated program review, data including student learning outcomes and student achievement data, and resource allocation. The Office of Institutional Effectiveness will also be assessing the student learning outcome cycles and how the student learning outcomes listed on the Program Review Update improve student learning and measure both program and institutional outcomes.

College of the Desert has implemented a consistent, three-semester assessment cycle across all academic disciplines. In the first semester, the SLO’s and corresponding assessment tools are identified. The tools are administered and data is collected. Faculty and staff are expected to complete their assessment reports up to section 3A before the end of that semester (1.25a). During the second semester of assessment, the results are analyzed, reported and discussed. Assessors must complete sections 3B through 5 on an assessment report and discuss the results within their discipline (1.25b). Reports are typically brought to department meetings during this phase. The third semester of the assessment cycle gives faculty and staff the opportunity to document and implement changes as a result of what they learned from their assessments. Finally, they are expected to complete the final section of the assessment report and submit it to their OAC Representative who will upload it to the Outcomes and Assessment Website on the College Portal. The assessment cycle is designed to start again in the following semester, allowing them to immediately gather data regarding any changes they have made. The assessment schedules for all disciplines are available to view on the College’s portal as well (1.23; 1.24). Individual course assessments can also be found on the College’s portal including changes that resulted from measuring student learning outcomes.

Also in progress, the Office of Institutional Effectiveness has collected three cycles of CCSSE (Community College Survey of Student Engagement) and will be analyzing the data and how it measures the progress of the College’s Institutional Outcomes. The College, the college constituents, and its respective committees continue to dialogue and improve our PIE process, which include assessment, program review, planning, and resource allocation (1.26).

The College has begun to build a strong Institutional Research Department that consists of a seasoned Research Director and three Research Analysts. The focus and charter of this department is to continue to develop the data warehouses focusing on quantitative and qualitative data and analysis in all areas of student learning and institutional planning processes (1.27).

College of the Desert satisfies Recommendation 1.
Recommendation 2:
In order to increase effectiveness, the team recommends that the college establish clear written policies and procedures on program elimination or significant changes to program requirements to enable enrolled students to make appropriate arrangements to complete their education in a timely manner with a minimum of disturbance. (II.A.6.b)

Response
College of the Desert has a clear policy on program discontinuance approved by both the Academic Senate and Board of Trustees (2.2; 2.3). There was direct input from stakeholders, with special emphasis on providing clear and concise information for students. The Academic Senate addressed this recommendation by developing a draft policy that was vetted and discussed at multiple times and venues including the College Planning Council, full Academic Senate, the Deans, and the President’s Executive Cabinet (2.1; 2.4). After several months of discussions with all stakeholders, the Academic Senate, with input from students and staff, submitted to the District Board of Trustees a policy for approval. The Board approved the policy on 16 December 2011 (2.5).

College of the Desert satisfies Recommendation 2.

Recommendation 3:
In order to increase effectiveness, the team recommends that the college investigate and create a plan to increase student, library, and learning support services for students in distance education and at off-site locations to ensure that they receive the same level and quality of services as students attending the main Palm Desert campus. The college must ensure equitable access to all of its students by providing appropriate, comprehensive, and reliable student, library, and learning support services regardless of location or means of delivery. This is especially important with regards to library services, including print resources, research assistance, and instruction. (II.B.3; II.B.3.a; II.C.1; III.C.1)

Response
College of the Desert continues to increase student, library and learning support services and activities for students in distance education courses and at education centers. The Program Review plans have identified and staff have taken steps to ensure the equitable support and services for all students, regardless of method or location of instructional delivery. In addition, the recent Substantive Change proposal and approval for Distance Education are clearly indicative of the College’s efforts to support students in Distance Education (3.1; 3.2).

Services available to students begin with a comprehensive College website that includes information about the admissions process, registration courses, student support services, library services, academic programs, college policy, and student life activities. Through the college website students have 24-hour access to online...
admissions application (CCCApply), online financial aid information and applications (FAFSA), an online orientation program, electronic forms and petitions, online FAQs with regard to counseling and advising, and links to various services outside of the College. This online access helps all students, including students taking online classes and classes at the College’s education centers. Services available to students in the Indio Center and the Mecca Thermal Center include textbooks for all classes on reserve, Academic Skills Center, computer labs, tutoring, counseling, EOPS/CARE, Disabled Student Programs and Services, admissions and records assistance, assessment testing, bookstore options, student activities, and additional workshops (3.3; 3.4).

Through two strategic grant efforts, the College has increased the on-site delivery of academic and counseling support at the Eastern Valley Centers. With funding from the US Department of Education, the College has implemented a TRIO-Student Support Services grant that is designed to serve the students who attend the centers. This grant provides dedicated counseling and tutorial support services to low-income, first generation college students who intend to graduate and transfer. The TRIO-SSS grant has provided increased counseling services, dedicated tutorial services, student development workshops, and tours of four-year transfer institutions (3.5).

The college also has a Title V-HSI grant that has enabled the hiring of the following staff to serve the Eastern Valley Centers: 1) a full-time bilingual counselor dedicated to the Eastern Valley Centers; 2) a part-time Counseling Support Assistant who is crossed-trained to provide information about admissions and financial aid; 3) a part-time bilingual Financial Aid Outreach staff member who assists in delivering financial aid and financial literacy information; and 4) a tutorial and supplemental instruction coordinator to initiate academic support services at the Eastern Valley Centers (3.6). Other activities include orientations and celebrations that mirror those at the Palm Desert Campus but are designed to reflect the particular nature of the Eastern Valley Centers, the implementation of a summer bridge program offered at the Indio location, and a series of in-person and online workshops on financial aid, financial literacy, new student orientation, academic standing, scholarships, student development workshops, and career development (3.7; 3.8; 3.9). In addition to workshops, the Outreach Specialist and Counseling Support Assistant provide "Enrollment Services" days at both the Mecca Thermal and Indio sites. On these weekly dates students can come to the sites and get their specific Admissions and Records and Financial Aid questions answered. To allow more access to workshops, the grant staff is currently in the process of developing online counseling and enrollment service workshops to students. In addition to support services, the grant also provides academic support through Supplemental Instruction with basic skills courses at the Eastern Valley Centers. This program uses successful students to provide academic support and review of course material for students in designated courses.

The Title V-HSI grant also assisted the college to implement a student portal system. This portal allows students to access their various accounts (WebAdvisor,
Blackboard, e-mail, etc.) through the use of a single sign-on, and also allows the College to more efficiently send information to students electronically through general information posts on the student portal. The Portal was launched in fall 2013 with full implementation in spring 2014 (3.10).

Finally, the College is utilizing its Title V-HSI grant to implement an early alert system. Called "Early Advantage," the service is designed as an early intervention for students who are observed to be experiencing academic difficulty in courses. A faculty member identifies a student at risk based on poor attendance, poor test scores, possible learning disability, need of psychological services, incomplete assignments, lack of motivation, or financial hardships (3.11). Once a student has been identified, the appropriate service area will be notified and students will be encouraged to meet with an Early Advantage coach or coordinator of one of the College’s special programs (e.g., EOPS, DSPS).

**College of the Desert satisfies Recommendation 3.**

**Response to Recommendation 4:**

**In order to meet Standards, the college should improve the timely and effective completion of faculty and staff evaluations (III.A.1.b)**

**Response**

College of the Desert has made considerable progress to improve the timely and effective completion of faculty and staff evaluations.

The Office of Human Resources manages a third-party software platform, TrakStar, which allows HR to monitor timely completion of evaluations. The software controls the distribution of notifications and evaluation procedures between employees and their supervisors. TrakStar compliance has been thoroughly reviewed for 2013 for all groups of employees. All management and classified staff are now on track to have completed evaluations for newly hired and existing staff, based on date of hire and established evaluation timelines. Monthly reports to the Executive Director of Human Resources contribute to the overall compliance to evaluation timelines across our various bargaining units and leadership. New staff in the Office of Human Resources has taken on the training of employees to use TrakStar, and new training sessions began in March 2013 and are planned every other month for groups and as needed for individuals. Additional online tutorial options, available at any time, are offered through the Human Resources portal on the College of the Desert intranet.

Educational Administrators, by action of the Board of Trustees, cannot receive a new employment agreement unless there is a current evaluation on file for that employee.

The staff and leadership groups are in compliance with the standard on timely and effective evaluations (4.1). Faculty evaluations are subject to collective bargaining. During the 2011-12 negotiation process, the TrakStar system was determined not to be adequate to contain all elements of the faculty evaluation process. Faculty
evaluation documents and timelines, developed through negotiations and in accord with California Education Code, do not lend themselves to the annual cycle that TrakStar automates.

In December 2012, the Office of Human Resources, after several months of vacancy, filled the position responsible for managing the faculty evaluation database. Within the first 30 days of hire, a new database to track, record and report on the timely and effective completion of evaluations for Full-time Faculty and Adjunct Faculty was developed and implemented (4.1). The database serves as a point of contact for all evaluation results and is used to monitor compliance according to established evaluation timelines via monthly e-mail communication reminders to the respective Deans and Vice Presidents. Continued use of the database, and a timely email communication process, will assist the Human Resources staff with tracking evaluations and will assist Deans and Vice Presidents to complete them in a timely manner. In addition, upon further discussion between HR and the software developers, TrakStar will also be adapted to monitor the process of faculty evaluations (what is done and when), while the elements of the evaluations themselves will remain outside the system. TrakStar will thus serve as a check on the timely completion of evaluations in conjunction with the HR database.

Current fulltime and adjunct faculty evaluations have been summarized as Current, Due, Past Due, or In Progress (Spring 2013). In summary, a complete audit of the status of evaluations for all employee groups, including administrators, staff and faculty, has been completed (4.1). A new internal HR database has been developed to monitor and record progress of completed evaluations. Communications have been sent to all employees and their supervisors advising them that evaluations are due or past due. Monitoring of evaluations with follow-up communications is being implemented. Substantial progress has been made on reducing the number of faculty who are overdue for evaluations.

College of the Desert satisfies Recommendation 4.

Recommendation 5:
In order to meet Standards, the team recommends that the district develop and implement appropriate policies and procedures that incorporate effectiveness in producing student learning outcomes into the evaluation process of faculty and others directly responsible for student progress toward achieving student learning outcomes (III.A.I.c).

Response
In the July 3, 2013 ACCJC letter, the visiting team acknowledge that “The College is still in the process of negotiating draft language for evaluation with respective bargaining units.”
For 2011-2014, the first College bargaining unit to incorporate student learning outcome language into their contract was College of the Desert Adjunct Association (CODAA). In Article XII: Evaluation, Section 5.d., the CODAA contract states that one of the mandatory components of the adjunct faculty evaluation process includes a “Mandatory Self-Evaluation” (5.1). Within Appendix D-4 of the CODAA contract labeled “Adjunct Faculty Self-Evaluation,” the form includes “Participation in the Assessment of Student Learning Outcomes” (5.2).

Prior to the 2013 ACCJC visit, the full-time faculty July 1, 2012-June 30, 2013 contract had no such language, but as the visiting team noted, the College was in the process of negotiating draft language for evaluation. For the July 1, 2013-June 30, 2015 full-time faculty contract of the CTA, the College full time faculty union, the contract included language incorporating student learning outcomes into the evaluation process for full-time faculty. In section 19.7 of the CTA contract, the self-evaluation packet includes “Reflection on participation in the student learning outcomes process,” which is the 5th component of the self-evaluation packet (5.3). The previous CTA contract included only four components. In the “Classroom Observation and Evaluation Narrative Form” (Appendix C-2 of the CTA contract), there is also a rating scale on “To what extent does the instructor demonstrates the following: 2) sets clear outcomes for student learning” (5.4). All faculty are encouraged to highlight their contributions to the development, implementation, and assessment of student learning outcomes as a component of their self-evaluation process.

In 2013, The College negotiated with the Classified Staff bargaining unit, California School Employees Association (CSEA) to include language into the Bargaining Unit contract as follows:

The following factor shall only be considered for self-evaluation purposes, and shall not be a factor in the supervisor’s evaluation of the unit member:

- Participation, when applicable, in the Assessment of Student Learning Outcomes.

Thus allowing the College to include as a component of his/her self-evaluation any classified member’s contributions to, “Participation, when applicable, in the Assessment of Student Learning Outcomes” (5.5).

All new full-time and adjunct faculty are made aware of all areas of evaluation upon their initial employment at the College. Additionally, the Office of Institutional Effectiveness provides a FLEX training session before the beginning of the Fall and Spring terms where staff provide an overview and training as to the evaluation process specifically addressing student learning outcomes and the faculty’s expected participation in their development, implementation and assessment on a continuous and ongoing basis (5.6).

To date, the evaluation forms for full-time and adjunct faculty contain a process for faculty to state and be assessed on their involvement in the development, implementation and assessment of student learning outcomes.
College of the Desert satisfies Recommendation 5.

Recommendation 6:
In order to increase effectiveness, the team recommends that the college continue to increase the diversity of its faculty, staff, and administrators to reflect the diversity of the student body. (III.4.2.b)

Response
College of the Desert continues to make concerted efforts to identify and address the barriers that keep our administrators, faculty, and staff diversity from reflecting the diversity of our student body. With a thorough analysis of current practices and the implementation of new strategies and initiatives, the college meets this standard. Efforts have been concentrated in the areas of the Equal Employment Opportunity (EEO) Plan, recruitment sources, applicant tracking systems, training for search committees, interview techniques, and diversity training.

In fall 2011, the Diversity Council completed the draft of the EEO Plan mandated by the California Community College Chancellor’s Office (6.1). The EEO Plan outlines the policies and procedures for recruitment and selection. Most importantly, it establishes official elements of the district’s diversity program (Component 14) and supports an environment that is welcoming to persons from all backgrounds and fosters a culture of cooperation and acceptance.

The Diversity Council set priorities for the diversity program for the 2011–2012 academic year (6.2). Priorities include reviews of the current hiring processes and application system, effectiveness of recruitment sources, and the provision of diversity training and programs that explore and celebrate the diversity of our students and employees.

The staff of the college’s Office of Human Resources (HR) reviewed the employment processes during a two-day retreat in August 2011. There was a concern by both leadership and full time faculty that in some cases interviews with candidates were only fifteen minutes in length. This did not allow for a complete interview process to ensure the college would hire only those instructors who best supported the Mission and Values of our college. In order to increase the effectiveness of the interview process and to gain more information about a candidate’s competencies, it has been recommended that interviews be increased to no less than thirty minutes for staff, sixty minutes for adjunct faculty and ninety minutes for fulltime faculty. It has also been recommended that all candidates for part-time faculty positions perform a teaching demonstration during the interview, a practice which is currently observed for fulltime faculty. Additionally, supervisors are recommended to meet with final candidates for a second interview. The length of an interview process is not the focus of the change. Rather length of an interview is being used to ensure that all hiring committees are focused on the qualities of the candidates.
There was also concern that the applicant tracking system (ATS), People Admin, was cumbersome for college users as well as presenting some difficulties for persons applying for positions. Additionally, the reporting features were limited and data on recruitment sources could not be extracted.

Two members of the Office of Human Resources attended the Society for Human Resources Management (SHRM) national conference in June 2011 (6.3). In addition to attending sessions on cutting-edge and best practices, the staff spoke to a variety of ATS vendors and diversity trainers. An HR implementation team interviewed several ATS vendors and purchased two application systems from SilkRoad. Open Hire, an ATS, is now live and operational. It provides effective reporting features, automatic posting to online and social media recruitment sources, and ease of use for applicants and campus users.

In addition, HR is in the process of implementing Red Carpet, an “onboarding” system. Red Carpet will facilitate the orientation for new employees and decrease the period of time it takes new hires to be effective in their new roles, thus increasing retention of new employees.

Behavioral interview techniques have been a major change to the interview process. Committees are being trained on the new techniques which ensure that interview questions are directly tied to competencies of the job and past performance. This style of performance-based interview avoids high risk questions and reduces bias. HR is in the process of assembling a database of behavioral questions based on competencies for use in interviews.

In January 2012, College of the Desert initiated a search for superintendent/president. The Diversity Council was in the process of researching new recruitment sources to increase the diversity of the applicant pools. Two new recruitment sources IMDiversity.com and AcademicCareers.com were identified and used for the superintendent/president search. Data from past recruitment and the current search has been gathered and will be analyzed to determine the effectiveness of each recruitment source (6.4).

A new training requirement that explores the dynamics of interviews and the influence of bias was created for the superintendent/president search (6.5). Bias operates on a subtle, unconscious level. The training instructs search committee members to become aware of their bias and bring that awareness to a conscious level (6.6). In addition, small dialogue groups of college constituencies were incorporated into the search process. The idea was adopted from a workshop on mini interviews attended at the SHRM conference. This technique allows more members of the college community to meet the final candidates and provide input to the Board of Trustees.

The Diversity Council sponsored several training and educational programs to increase employee diversity awareness and cultural competency (6.7). The college has continued its support of Seeking Educational Equity and Diversity (SEED). SEED-6, a year-long
seminar group, focuses on developing inclusive curriculum. The leaders of SEED-6 facilitated a professional development exercise for the faculty-at-large on the same subject. The Diversity Council also sponsored a speaker who addressed the administrators and faculty on building relationships in a multi-generational workforce and in the classroom (6.8). HR staff attended a workshop on gender in the workplace at the SHRM conference as well as spoke to vendors who provide diversity training. The Diversity Council is also researching diversity training offered by outside vendors and the Anti-Defamation League.

Finally, the Diversity Council is deeply engaged in creating a campus culture that is welcoming to persons of diverse backgrounds. It encourages students and faculty to organize events that celebrate our rich diversity. Over the last several years the Diversity Council has supported student organizations such as MEChA, Latina Leadership Network, World Beat, and Alas Con Futuro in putting on events such as “Cesar Chavez Day,” “International Women’s Day,” “Celebration of Student Writing,” “Winter Festival,” and “Day of the Dead” (6.9)

**College of the Desert satisfies Recommendation 6.**

**Recommendation 7:**

In order to improve communications, the team recommends that the district institute an educational program for all campus constituent groups that seeks to better inform stakeholders on the decision-making processes that are currently in place. (IV.A.2)

**Response**

The college is in the process of a three-prong action plan in order to improve communication throughout the college. The college has identified the specific areas addressed by ACCJC that resulted in this recommendation from the commission:

- “Changes in administrative/academic structures are problematic for faculty and staff.”
- “Academic senate expressed confusion about decision-making procedures.”
- “Communication problems exist, and they (faculty/staff) are unaware of the decision-making processes.”

Effective 1 July 2011, College of the Desert implemented a reorganization of Academic Affairs to help facilitate a more effective and seamless means of communication between faculty/staff and administration (7.1). The task-force that undertook this reorganization consisted of representatives from across the college community including leadership, faculty (both fulltime and adjunct), staff, and student representatives. The former School of Liberal Arts and Sciences has been reshaped into two schools: the School of Communication and Humanities and the School of Arts and Sciences. Both
schools are supported by a dean and include several faculty department chairs that support communication efforts between faculty and deans in the following programs:

School of Liberal Arts and Sciences
- Arts and Media
- Math
- Science
- Social Sciences

School of Communication & Humanities
- English
- Languages
- Non-Credit Programs
- Reading

Since the implementation of these changes, College of the Desert enjoys a more harmonious campus culture among all the schools as information regarding decision making is more transparent and easily shared. In addition, each dean in both Academic and Student Affairs serves on a designated Academic Senate Subcommittee as a further means of strengthening communication between faculty and administration. All agenda and minutes for the Academic Senate and the College Planning Council (CPC) are posted on the college portal, which is accessible to all employees.

In 2011, the CPC created, and made available to all employees, a PowerPoint that outlines the college’s planning process (7.2). This PowerPoint was designed to aid our employees in better understanding the process in hopes each employee will be encouraged to become more involved in the decision-making process. The college recognizes that the more involved our students, faculty, and staff become in assisting the leadership of the college in forming policy, the more it will positively affect student learning.

As a reaction to the state’s budgetary crisis, in summer 2011, the president created several study groups and eventual “Think Tanks” to foster dialogue on the best ways to help the college become more effective and efficient while maintaining the highest levels of instruction and student support services (7.3). These groups were made up of members of all levels of the college community including leadership, faculty, staff, and students. In some cases, there was one member of the Board of Trustees on a Think Tank. After the Summer Study groups developed action plans and began to identify key information needed to make recommendations to the President, the College implemented Think Tanks for the following areas (7.4):

- Co/Extra Curricular Activities
- Compensation/Workforce
- Curricular
- Facilities
- Operations
• Revenues/Fees

The Think Tanks were co-chaired by administrators, and in most cases, faculty. Each
Think Tank included constituents from faculty, staff and students as well as members of
the community. In December 2011, each Think Tank presented initial recommendations
to all members of the College Planning Council. In February 2012, the recommendations
were finalized and presented to the president for consideration. The President, working
with the Executive Cabinet, created a 5-year plan, which was presented to the College
Planning Council in May 2012.

All meeting announcements, agendas, minutes and all Think Tank recommendations
were posted on the college Portal and were made available to all members of the
campus community at all stages of their development (7.5). Input was encouraged from
program stakeholders, as well as others.

As part of the “Shared Governance @ COD” program of the CPC, a web site on the
College’s Portal - featuring announcements for past and future College Planning Council
meetings, agendas, upcoming trainings/workshops, and meeting minutes - continues to
be maintained for any community member to view at any time.

College of the Desert satisfies Recommendation 7.

Recommendation 8:
In order to increase effectiveness, the team recommends that the board regularly
evaluate its policies and practices and revises them as necessary. (IV.B.I.e;
II.A.6.c)

Response
College of the Desert ensures the effectiveness of all board policies and administrative
procedures by reviewing all policies and procedures on a clearly defined and publically
stated set interval.

Through the systematic review of the college’s policies, in conjunction with a recent team
visit during our 2010 Reaffirmation of Accreditation, the college leadership chose to form
a task force to evaluate the necessity for a board policy that would outline a procedure
and timeline for the timely review of all Board of Trustee’s policies and supporting
administrative procedures.

A task force of one administrator, one faculty member, one classified member, and one
student was formed to review the accreditation visiting team’s recommendation and to
draft a proposed board policy and administrative procedure that would allow for the timely
review of the college’s board policies and administrative procedures.

On 3 November 2011, the task force met. All documents pertaining to the review
process of board policies were reviewed. These documents include:
• Board Policy 2410
• Administrative Procedure 2410
• Tracking forms documenting previous review

The task force decided to revise existing Board Policy 2410 and the corresponding administrative procedure to include a more clearly defined procedure for reviewing all board policies and administrative procedures (8.1).

The task force proposed that all board policies and administrative procedures should be reviewed on a five-year rotational basis (20 percent annually). The following language was drafted to outline the process for review:

During each spring semester, the president will cause to be undertaken a systematic review of approximately 20 percent of the board policies and related administrative procedures according to a review time-table. At the November meeting, the president will present recommendations to the board for first reading of intention for adoption, revision, or deletion of policies and related procedures. In addition, the president will report all policies and procedures that have been reviewed and deemed appropriate. On 16 November 2011, the task force met and reviewed the draft revisions of both the board policy and administrative procedure. Final revisions were made, and both the board policy and administrative procedure were forwarded to the president for consideration. On 5 December 2011, the president approved both documents as to form and content. He outlined an approval process that allowed for the entire college community to offer input before the Board of Trustees considered the revised documents (8.2).

The board policy and administrative procedure were presented to the President’s Cabinet on 6 December 2011 where the cabinet discussed and subsequently approved both the board policy and administrative procedure as proposed (8.3). On 10 February 2012, the College Planning Council voted to accept the revised board policy and administrative procedure as proposed (8.4).

As directed by President Patton, the proposed board policy and administrative procedure were placed on the agenda for the Board of Trustees for their first reading on 17 February 2012 (8.5). After the second reading on 16 March 2012, the Board of Trustees approved the proposed policy and procedure (8.6).

As of 17 February 2012, the president has completed the review of 20 percent of all existing board policies and administrative procedures and has forwarded all appropriate modifications to the Board of Trustees for consideration and action.
At the completion of each evaluation cycle, the president will review the process, including the timeliness of the review cycle for revisions or adjustments as needed, to address the requirements of the college and its mission.

**College of the Desert satisfies Recommendation 8.**
Response to Self-Identified Issues

The majority of the self-identified planning issues were incorporated into the team recommendations and the ACCJC letter. Therefore, the responses and evidence from the earlier part of the report are not repeated. For the self-identified planning issues not addressed in the team recommendations, status updates, corresponding information and evidence are addressed in the table below.
### COD Accreditation Self-Identified Issues
