References - general information
References to periodical articles – journals, magazines, newspapers
References to an entire book
References to an edited book
References for encyclopedias or dictionaries & entries in encyclopedias
References for Dissertations
References to Research Reports & Papers, incl. Gov. documents
References to audio-visual media
References for Web site content, blogs, & data/content that do not easily fit into categories
The DOI

Adapted from Cornell University Library PSEC Documentation Committee
November 2002; Revised April 2011
General Information about References. All references cited in the research paper text must appear on a References page, which provides the information necessary to identify and retrieve each source. References to periodical articles must include the following elements: author(s), date of publication, article title, journal title, volume number, issue number (if applicable), and page numbers.

ORDER: Entries should be arranged in ALPHABETICAL ORDER BY AUTHORS’ LAST NAMES. Sources without authors are arranged alphabetically by title within the same list.

AUTHORS: Write out the last name and initials for all authors of a particular work. Use an ampersand (&) instead of the word "and" when listing multiple authors of a single work, e.g. Smith, J. D., & Jones, M.

DATE: Publication year should be in parenthesis (if no date, use n.d.); if a journal article, also include month and day.

TITLES: Capitalize only the first word of a title or subtitle, and any proper names that are part of a title.

VOLUME/PAGES: If a journal, include volume number and issue number. Use the abbreviation p. or pp. to designate page numbers of articles from periodicals that do not use volume numbers, especially newspapers. These abbreviations are also used to designate pages in encyclopedia articles and chapters from edited books.

INDENTATION: The first line of the entry is flush with the left margin, and all subsequent lines are indented (5 to 7 spaces) to form a "hanging indent".

UNDERLINING vs. ITALICS: It is appropriate to use italics instead of underlining for titles of books and journals.

Two additional pieces of information should be included for works accessed online.

Internet Address: A stable Internet address should be included and should direct the reader as close as possible to the actual work. If the work has a digital object identifier (DOI), use this. If there is no DOI or similar handle, use a stable URL. If the URL is not stable, as is often the case with online newspapers and some subscription-based databases, use the home page of the site you retrieved the work from. *(For more information on the DOI, see p. 12.)*

Date: If the work is a finalized version published and dated, as in the case of a journal article, the date within the main body of the citation is enough. However, if the work is not dated and/or is subject to change, as in the case of an online encyclopedia article, include the date that you retrieved the information.
References to periodical articles must include the following elements: author(s), date of publication, article title, journal title, volume number, issue number (if applicable), and page numbers.

Journal article, one author, accessed online

*Organizational Behavior and Human Decision Processes, 105*(2), 221-232.

doi:10.1016/j.obhdp.2007.08.002

Journal article, two authors

Journal article, more than two authors, accessed online

Article from an Internet-only journal

Journal article from a subscription database (no DOI)
Magazine article, in print

Newspaper article, no author, in print

Newspaper article, multiple authors, discontinuous pages, in print
References to an entire book must include the following elements: author(s) or editor(s), date of publication, title, place of publication, and the name of the publisher.

No Author or editor, in print

One author, in print

Two authors, in print

Corporate author, author as publisher, accessed online

Edited book
**References in edited books** must include the following elements: essay or chapter authors, date of publication, essay or chapter title, book editor(s), book title, essay or chapter page numbers, place of publication, and the name of the publisher.

**One author**

**Two editors**
References for encyclopedias or dictionaries & entries in an encyclopedia
must include the following elements: author(s) or editor(s), date of publication, title, place of
publication, and the name of the publisher. For sources accessed online, include the retrieval
date as the entry may be edited over time.

Encyclopedia set or dictionary

Article from an online encyclopedia
http://search.eb.com

Encyclopedia article
Publications.
References for dissertations should include the following elements: author, date of publication, title, and institution (if you accessed the manuscript copy from the university collections). If there is a UMI number or a database accession number, include it at the end of the citation.

Dissertation, accessed online

References to research reports & papers, including government documents must include the following elements: author(s), date of publication, title, place of publication, and name of publisher. If the issuing organization assigned a number (e.g., report number, contract number, or monograph number) to the report, give that number in parentheses immediately after the title. If it was accessed online, include the URL.

Government report, accessed online

Government reports, GPO publisher, accessed online

Technical and/or Research Reports Accessed Online

http://pesd.stanford.edu/publications/gazprom_gas_giant_under_strain/
References to audio-visual media must include the following elements: name and function of the primary contributors (e.g., producer, director), date, title, the medium in brackets, location or place of production, and name of the distributor. If the medium is indicated as part of the retrieval ID, brackets are not needed.

**Videocassette/DVD**

**Audio recording**

**Motion picture**

**Television broadcast**

**Television show from a series**

**Music recording**
References for undated website content, blogs, & data/content that do not easily fit into categories such as web-based journal papers, books, and reports, keep in mind the goal of a citation is to give the reader a clear path to the source material. For electronic and online materials, include stable URL or database name. Include the author, title, and date published when available. For undated materials, include the date the resource was accessed.

Web site: no author, no date of publication

Blog entry

Professional Web site

Data set from a database

References for citing an entire Web site (not a specific document on that site), no Reference List entry is required if the address for the site is cited in the text of your paper.

Witchcraft In Europe and America is a site that presents the full text of many essential works in the literature of witchcraft and demonology.
Using a DOI in Your Reference List
You have probably had difficulty at some time locating information about electronic resources. They can change or even disappear, and that makes citing them in your reference list challenging. Various publishers have started using what is called a DOI number that offers readers a persistent link to the source on the Internet. This handout explains how to cite with a DOI number.

What Is a digital object identifier, or DOI?
A DOI is a unique alphanumeric string assigned by a registration agency (the international DOI Foundation) to identify content and provide a persistent link to its location on the Internet. Typically it is located on the first page of the electronic journal article, near the copyright notice. It can also be found on the database landing page of an article.

How do you use a DOI in a reference list?
Use a DOI number instead of the URL. You don’t need to list the database you used to find the source either. Here is an example:

(Note: The APA manual uses lower case in the reference list but all caps in the explanations.)

How does a reader use a DOI number?
Your professor can check your reference by entering the DOI into www.CrossRef.org where the number will serve as a way to find that reference.

What if there is no DOI? Use the URL if there is no DOI number:
