## **Evacuation**

### **Procedures for Instructional/Office Staff on Attendance Tracking**

The primary causes for evacuation will be fire or earthquake. Each instructor/area coordinator must be prepared to react quickly and properly. Each instructor/area coordinator must have an accurate accounting of attendance. Faculty should use their class roster.

### **PROCEDURES:**

- Remain calm and determine the nature and location of the disaster without leaving the immediate area just outside of the classroom.
- Emergency Assembly Areas: There are two areas on campus to assemble after a major disaster. One is located on the east side of campus and the other on the west side of campus.
  - West-side Assembly Area: **The covered parking area (Lot 28) across Alumni Road to the west of the campus is the west side assembly area.** It will also serve as the emergency first-aid station. In the event this site is not useable, use East-side Assembly Area.
  - East-side Assembly Area: **The football stadium area will serve as the east-side assembly area.** In the event this site is not useable, use West-side Assembly Area.
- Faculty: Remain with students until further direction is given. This direction may come in a variety of ways depending upon the nature of the event which caused the evacuation. Directions will be given out as needed or as they become available.
- Office Areas: Remain with group until all are in attendance.
- In all cases, be certain that injured and disabled are evacuated and cared for; all students and staff are accounted for; and the alarm has been sounded if you or someone in your class was the first to discover the potential disaster.

## **Fire, Smoke, Explosion**

### **WHAT TO DO:**

1. PULL ALARM – This AUTOMATICALLY SUMMONS Fire Department. If an alarm is pulled and sounding **THEN YOU MUST EVACUATE THE BUILDING.**
2. Call and report fire to Security Emergency number.....2111  
Security outside phone.....(760) 341-2111
3. If the fire is easily extinguishable, attempt to extinguish it. Fire extinguishers are located near the exits. You have a choice on each incident to fight the fire or flee. Learn where the two closest fire extinguishers are near your work area.
4. Evacuate the building if necessary, closing the fire doors (do not lock).
5. Proceed to designated area on the campus – see attached maps.

### **Responsibility of Supervisors, Managers, and Faculty:**

The supervisor, manager, and instructor are to supervise the clearing of his/her area during an emergency evacuation, in an orderly manner using the designated evacuation paths to the designated safety areas. Attendance should be taken of each area evacuated. Faculty should use their class roster.

Assembly areas are displayed on the map posted within this document. If the Emergency Alarm sounds evacuate the building. In extreme situations, evacuation should take place to the evacuation areas designated on the building maps located in each classroom. If the fire alarm is terminated, work with the Security Officers/Fire Department to determine if the building is all clear. The Administrator-in-charge's approval is required to send students and staff back into an evacuated building.
